

Product Fact Sheet

Synthetic Transmission Assembly Lube

SMART BLEND Synthetic Transmission Assembly Lubricant is the highest quality synthetic lubricant available for automatic or manual transmissions assembly. SMART BLEND assembly lube provides superior lubrication during the assembly process, while providing the proper tackiness required for assembly.

SMART BLEND is clear and will prevent misdiagnosing leaks. It's compatible with all transmission fluids (mineral or synthetic). SMART BLEND ensures the transmission is assembled to last and will not clog filters. Synthetic formula provides superior protection during start up

Compatible with Synthetic or Mineral oil base ATFs unlike other products
Dissolves quickly at operating temperatures
Maintains tackiness during warm temperatures
Clear formula eliminates misdiagnosing leaks

Package

12 – 1 lb. tubs / cs

Part

5500
